CONTENTS TO VOLUME I., SECOND SERIES.

JANUARY, 1913.

Announcement of the Transfer of the Review to the American Physical Society 1

Diffraction and Secondary Radiation with Electric Waves of Short Wave-Length. A. D. COLE 2

The Velocity of Electrons in the Photo-electric Effect, as a Function of the Wave-Lengths of the Light. DAVID W. CORNELIUS 16

On the Comparative Absorption of γ and X Rays. S. J. ALLEN and E. J. LORENTZ 35

Study of Resistance of Carbon Contacts. A. L. CLARK 50

Angle in Vector Algebra; and Composition of Rotations. FREDERICK SLATE 56

American Physical Society 60

Minutes of the Sixty-fourth Meeting; Minutes of the Sixty-fifth Meeting; Treasurer's Report for the Year 1912; The Intrinsic Brilliancy of the Glow-worm, *Herbert E. Ives* and *C. W. Jordan;* The Effect of Drawing on the Elasticity of Certain Wires *L. P. Sieg;* The Cooling Effect which Accompanies the Emission of Electrons from Hot Bodies, *H. L. Cooke* and *O. W. Richardson;* On the Cause of the Apparent Differences between Spark and Arc Sources in the Imparting of Initial Speeds to Photo-electrons, *R. A. Millikan;* The Stability of Residual Magnetism, *N. H. Williams;* Some Direct Measurements of the Temperature Corrections to the Refractive Index of Water around 20° C., *F. A. Molby;* The Effects of Gas Currents on Sound, with Applications to Ventilating Systems of Auditoriums, *F. R. Watson;* Air Resistance to Falling Bodies, *A. A. Somerville;* Distribution of the Elements in the Solar Atmosphere, *Charles E. St. John;* On the Value of *e*, *R. A. Millikan;* A Substitute for a Bronson Resistance, *D. W. Cornelius* and *J. G. Kemp;* The Relation between Current and Time Rate of Change of Electric Force, *Max Mason;* The Evidence that Sodium Belongs to a Radioactive Series of Elements, *F. C. Brown.*

FEBRUARY, 1913.

Some Characteristic Curves for Gases at Low Pressures. ROBT. F. EARHART 85

Viscosity and Fluidity—A Summary of Results. II. EUGENE C. BINGHAM 96

An Absolute Determination of the Viscosity of Air. LACHLAN GILCHRIST 124

Determination of the Heat of Solution of Metals by Means of a Vacuum Flask Calorimeter. E. E. SOMERMEIER 141

The Electron Theory of Phosphorescence. CHESTER A. BUTMAN 154

On the Theory of Relativity: Mass, Force and Energy. R. D. CARMICHAEL 161

MARCH, 1913.

On the Theory of Relativity: Philosophical Aspects. R. D. CARMICHAEL 179

Change of Index of Refraction of Water with Change of Temperature. FREDERICK A. OSBORN 198

On the Electrical Nature of Cohesion. FERNANDO SANFORD 211

Brownian Movements in Gases at Low Pressures. R. A. MILLIKAN 218

Rectifying Properties of a Photo-Electric Cell. S. HERBERT ANDERSON 222

Ionization of Potassium Vapor by Ultra-Violet Light. S. H. ANDERSON 233

Proceedings of the American Physical Society 237

A Method of Production of Light-Negative Selenium, *F. C. Brown;* Summary of a Study of the Electric Furnace Spectrum of Iron, *Arthur S. King;* The Earth Inductor

259028

as an Inclinometer, *N. E. Dorsey;* The Use of Sounding Boards in an Auditorium, *F. R. Watson;* The Effect of Magnetization on Thermal Conductivity, *N. F. Smith;* Line Structure and Shift with an Echelon Spectroscope, *Norton A. Kent;* Vacuum Tube Discharge in a Magnetic Field, *Norton A. Kent and Royal M. Frye;* Resistance of Oxides at High Temperatures, *A. A. Somerville;* A Micropyrometer, *George K. Burgess;* Optimum Wave-length in Radio-telegraphy, *A. H. Taylor;* The Similarity of Electrical Properties in Light-Positive Selenium to those in Certain Crystal Contacts, *T. C. Brown;* Comparison of Small Electrostatic Capacities, *J. C. Hubbard and H. F. Stimson;* The Determination of the Period of Electrical Oscillations, *J. C. Hubbard;* The Constants of Spectral Radiation of a Uniformly Heated Enclosure or So-called Black Body, *W. W. Coblentz;* An Application of High Tension Oscillatory Systems to Ignition, *M. E. Graber;* A Method for Charging the Needle of a Quadrant Electrometer, *Henry A. Erikson;* The Distribution of Velocities among the Photoelectrons emitted from Thin Cathode Films when illuminated by a Mercury Vapor Lamp, *Paul H. Dike and F. C. Brown;* On the Origin of the Earth's Magnetic Field, *L. A. Bauer;* A Comparative Study of the Joule and Wiedemann Magnetostrictive Effects in Nickel Rods, *S. R. Williams;* Change in Electrical Conductivity due to the Orientation of Oblate Spheroids within the Conductor, *S. R. Williams;* Notes on Problems Involved in Producing Three-Color Transparencies, *Charles D Hodgman.*

APRIL, 1913.

The Annealing of Steel in an Alternating Magnetic Field. H. PENDER and R. J. JONES 259

Conditions of Sensibility of Photo-electric Cells with Alkali Metals and Hydrogen. J. G. KEMP 274

The Optical Constants of Sodium and Potassium. R. W. and R. C. DUNCAN 294

A Method of Producing Known Relative Sound Intensities and a Test of the Rayleigh Disk. G. W. STEWART and HAROLD STILES 309

A Potential and Electrostatic Force in the Field of Two Metal Spherical Electrodes. III. Charge and Capacity. GEORGE R. DEAN 316

Optimum Wave-Length in Radiotelegraphy. A. H. TAYLOR 321

Proceedings of the American Physical Society 326

Minutes of the Sixty-sixth Meeting; On the Beaded Character of the Deflected Cathode Ray Line as Revealed by Instantaneous Photographs taken at Short Range, *Chas. T. Knipp;* Dynamic Characteristics of the Wehnelt Rectifier, *R. A. Porter;* The Dimensions of Electric and Magnetic Quantities, *David L. Webster;* A Powerful Source of Ultra-violet Light for Photo-electric Work, *Albert W. Hull and Ancel St. John;* Note on the Aging Effect as an Influence on the Number and the Velocities of Photo-electrons from Thin Cathode Films, *Otto Stuhlmann, Jr.;* Trial of a Method for Obtaining Equality of Temperature, at High Temperatures, *C. F. Lorenz;* The Series System in the Spectra of Ca, SR, Ba, *F. A. Saunders;* The Constants of Spectral Radiation of a Uniformly Heated Enclosure, *W. W. Coblentz;* The Actinodielectric Effect of Sulphur, *Chester A. Butman;* A New Vacuum Gage of Extreme Sensitiveness, *Irving Langmuir.*

MAY, 1913.

The Hall Effect and Some Allied Effects. ALPHEUS W. SMITH 339

The Effect of Dielectrics on Unipolar Induction. E. H. KENNARD 355

The Stability of Residual Magnetism. N. H. WILLIAMS 360

Note on the Velocity of Electrons Liberated by Photo-electric Action. KARL T. COMPTON 382

The Variation of the Alpha-Ray Ionization of Radioactive Solids with the Thickness of the Layer. HERBERT N. MCCOY 393

The Periods of Transformation of Uranium and Thorium. HERBERT N. MCCOY 401

Proceedings of the American Physical Society 405
On a Progressive Development of the Fundamental Principles of Mechanics, *H. M. Dadourian;* The Ionization in Unstriated Discharge, *C. D. Child;* On Special Conditions in the Electric Furnace which Produce a Spectrum Similar to that of the Spark, *Arthur S. King.*

JUNE, 1913.

Multiple Reflection of Short Electric Waves from Screens of Metallic Resonators. W. L. SEVERINGHAUS and W. S. NELMS 411
A Systematic Study of Linear and Non-Linear Resonators for Short Electric Waves. W. S. NELMS and W. L. SEVERINGHAUS 429
Specific Inductive Capacity and Atomic Charges. FERNANDO SANFORD 446
A Study of the Reversible Pendulum. Part III. A Critique of Captain Kater's Paper of 1818. JOHN C. SHEDD and JAMES A. BIRCHBY 457
On a Method of Comparing Inductance and Capacity. W. E. FORSYTHE 463
Proceedings of the American Physical Society 466
Minutes of the Sixty-seventh Meeting; A Modification of the Carey Foster Method of Comparing Resistances, *Frank Wenner;* A Specific Heat Calorimeter for Small Temperature Intervals, *D. R. Harper, 3d;* The Spectrum of Active Nitrogen, *E. P. Lewis;* On the Construction of Calorimetric Thermoelements, *Walter P. White;* Further Thermoelectric Methods in Calorimetry, *Walter P. White;* On the Photoelectric Potentials and Currents from Thin Cathode Films, *K. T. Compton and Otto Stuhlmann, Jr.;* An Attempt to Measure in Radiation Units the Intensity of the Source Producing Photo-Electric Effects for Various Wave-Lengths, *P. B. Perkins;* The Spectrum of Magnesium Vapor, *James Barnes;* Preliminary Report on Throttling Experiments with Superheated Steam, *Howard M. Trueblood;* Note on the Value of Throttling Experiments as a Basis for Computing Steam Tables, *Harvey N. Davis;* Light from Uncharged Molecules, *C. D. Child;* Note on the Construction of Thermopiles, *W. W. Coblentz;* A Vibration Electrometer, *Harvey L. Curtis;* Radiation from Solid and Molten Iron, *C. C. Bidwell;* A New Thermo-Element for High Temperature Work, *C. C. Bidwell;* On the Occurrence of Hydrogen Lines in the Tube-Arc and Application to the Nature of Enhanced Lines, *Arthur S. King.*
Index 486
